

## **Johor Royalty: “Bigfoot” could be the black gorilla that Grandfather released years ago.**

Malaysia Johor Royalty Tengku Ibrahim said Bigfoot could be gorillas; these gorillas may be the offspring of the Black gorilla that his grandfather released into the forest years ago. Sultan Ismail used to have 40 black gorillas.

Johor Wildlife Animal Protection Society claimed that the Johor state forest has about 40 Bigfoot; one statement mentioned that one of the Bigfoot is believed to be 63 years old has brought the attention of Tengku Ibrahim. The royalty has doubts on this view and wished that authorities to provide concrete evidence.

The Royalty said, “If there are 40 Bigfoots, who counted them? How would the person know that some of the Bigfoots was 60 years old, and is about to die soon? If the person had made such claims, it would mean that he has seen the Bigfoot himself.”

The Royalty met the Reporter from “Cosmopolitan Daily” at the Johor Bahru Pasi Plangi Palace on Thursday, and made the above statement. The Royalty reminded all not to speculate the recent findings of “Bigfoot print” in the Johor Forest as the “Bigfoot”.

“I could be right, and possibly wrong. No matter what, I support the research executed by the state government, to prove the existence of the Bigfoot, but it has to be done meticulously and honestly.”

### **Late Sultan Ismal used to rear 40 primates**

The Royalty remarked that in his own opinion, he believed that the “footprint” found in the Kota Tinggi Forest, belongs to the larger primates.

He said that his grandfather, the late Sultan Ismail used to rear about 40 primates; he had donated several animals to various zoo, including the South Perth Zoo in Australia.

“Therefore I believe that part of the primates have been released into the wild forest and some being donated to several zoos, including the Perth Zoo. These activities were published in the newspaper in the 1970 and 1973.”
